

CHINO VALLEY FLYERS

Video and Photo Journal

Videos

The CVF PVJ (Photo Video Journal) is a "just for fun" publication and should not be confused with the club's official newsletter published monthly by Bob Shanks.

One of the "Wrong Brothers" but John says that paragliders aren't really his specialty.

Lee says he just put on the landing gear two days before. It looks like he picked up a souvenir weed.

Al didn't crack up from flying today. Al showed up cracked.

05-21-2026

Bryan showing what's left after his maiden flight. Actually, it's the first part of a 3D printed plane.

Let's hope the launch goes better than the "Wrong Brothers".

The plane's tail fell off but the plane still flew. Gary was able to guide it down to the ground.

Dan just switched to a FrSky transmitter. This is the range test and Robert turns the F-16 in a circle to verify that the controls work in all orientations.

Turbine Jet Pilot Certification Flight

06-04-2026

Certified turbine pilots

Getting an RC jet turbine certified—commonly known as earning a **turbine waiver** or **certificate**—is required to fly model turbine aircraft safely and legally at most flying fields. In the United States, this process is administered by the Academy of Model Aeronautics (AMA) and requires passing both a **knowledge assessment** and a **practical flight test** observed by two certified turbine pilots.
